

Manual**Welcome to 2dx_image**

This program assists you in the processing of one 2D crystal image. Help is available [here](#). Try the right mouse click on the various fields or variable names, to get more information. See also the introductory [Movie](#) tutorials.

2dx_image uses external programs to display certain files. These can be defined in the 2dx configuration file, which you can find (and edit) in your home directory under .2dx/2dx.cfg . Use this file to define your preferred editor, web browser, etc.
